

LETTER OF ENGAGEMENT & OFFER OF EMPLOYMENT

Position:	Founding AI Architecture Lead	Date:	August 1, 2026
Program:	Sarvam Startup Program	Reporting To:	Aditya (Founder & CEO)

Dear Founding Engineer,

We are thrilled to formally offer you the position of **Founding AI Architecture Lead at Repairo**. Following our discussions, we believe your background in **AI, Robotics, and Autonomous Systems** makes you the ideal leader to own our **AI Model Transformation Pipeline**.

1. Role & Scope of Ownership

As Founding AI Architecture Lead, you will own the core intelligence and multi-language engine of Repairo:

- **AI Model Transformation Pipeline:** Build the autonomous system that detects LLM API deprecations, maps prompt/parameter schema changes, and refactors call-sites (OpenAI v3 → v4, Gemini 1.5, Claude 3.5).
- **Multi-Language AST Engine:** Expand Repairo's Abstract Syntax Tree parser across **TypeScript, Python, C++, and Rust** for AI/ML and Robotics codebases.
- **Autonomous Control Loops:** Design self-healing verification loops that validate generated code patches against test suites before opening reviewable Pull Requests.

2. Zero-Retention Security Guarantee

Zero-Retention Memory Vault Architecture:

Repairo parses customer code strictly in volatile RAM with an immediate ~24ms purge cycle. All IP and model prompts are protected under formal assignment agreements.

3. Engagement & Equity Terms

- **Title Level:** Founding Core Executive / Lead Engineer
- **Founding Equity:** Allocation in the Founding ESOP Pool under the Sarvam Startup Program structure.
- **Work Setup:** Hybrid / Remote

We are excited to build the future of autonomous developer tools with you on the team.

Aditya

Founder & CEO, Repairo
